NUTRITION TIP OF THE WEEK FROM THE KSC FITNESS CENTERS: Caffeine boosts energy, fights fatigue and steps up your heart rate. Which claims are true and which are pure hype? The answer is, all may be true. Caffeine is one of the world's most widely used drugs, it acts as a mild stimulant, it can temporarily speed heart rate, and it can wake you up and give you a short burst of energy. Caffeine on the down side could also irritate your stomach or cause headaches and insomnia. Caffeine acts on the central nervous system and has mild anti-depressant effects, so some psychiatrists say it's not surprising that habitual coffee drinkers report feeling better and less irritable after their morning fix. For those who are trying to kick the caffeine habit, doctors say it's a good idea to reduce the amount of caffeine gradually to avoid withdrawal headaches. Try mixing half decaf and half regular or try every other cup decaf. (TA-C2)

WIRELESS (CELLULAR) PHONES: Effective October 2, 2001, NASA policy prohibits the use of hand-held wireless (cellular) phones by KSC employees when driving motor vehicles owned, leased, or rented by the Federal Government. This new policy will be incorporated into the NASA Safety Manual, NPG 8715.3. (TA-E1)

ENTER AMERICA RECYCLES DAY PLEDGE DRAWING: Everyone is encouraged and invited to pledge to buy recycled, recycle more, or support an **America Recycles Day** recycling event on, or leading up to November 15.
